How to play games on texas instruments ti-83 plus

File Archives TI-83/84 PLUS BASIC GAMES (FIRST-PERSON SHOOTERS) Archive Statistics Number of files 15 Last updated Saturday, 26 February 2011 Total downloads 389,423 Most popular file. TI_Doom v1.3 with 104,819 downloads. Click a filename to download that file. Click a folder name to view files in that folder. Click for file information. Icon legend: File with screen shots File with animated screen shots File with reviews Featured programs NameSizeDateRatingDescription (Parent Dir)/Folder Up To TI-83+Plus BASIC Gamesdemo2.zip12k09-08-28DOOM****NEW UPDATE**** Be the first in school to experience newer graphics, high scores, and incredible animations! If you have any questions, feel free to e-mail me at librajr@comcast.net. PLEASE RATE!!!dooomc.zip6k00-12-10Doom: Epoch Chrono you've played Doom before. How many times have you played it on a calc? Well, here it is, you are an everyday guy who gets sucked into some alien vortex and, get this, you have to kill everything to get home. Now what does that remind you of? .? .? doomtime.zip2k00-08-19Doom83 (multitasking version)Doom83 is a shoot 'em up for the 83+. This version of Doom83 is identical to the old one except this version supports multitasking. You now have the ability to preserve Doom83's state and then restore later.doom.zip9k02-05-20TI_Doom v1.3This is a game totally in 3D based on Doom. It is quite fast, you can found 3 different weapons: the pistol, the shotgun and the chaingun, there are 2 different enemies with their own animation. This game is really great! It is one of the best doom-likes programmed in Basic for the TI-83(+). And there are 10 levels! Download it!!! ****NEW UPDATE**** Now on 83 AND 83+!gw.zip5k00-11-13Gundam Wing 83A fast first person Gundam Wing game where you can customize your gundam to an extent and battle Leos, Mobile Dolls, and Epyon. I must have game for anyone who likes Gundam Wing.hi.zip3k00-11-07Half-Life : Gordon Freeman is backThe famous game of Sierra for your TI-83+ionquest.zip5k04-09-16Alex's lonquest DemoThe celebrated author of Power Pixel and Rushon2 brings you the best BASIC FPS raycasting engine out there! Actually it's the only one. I have sped it up! Now more than one frame per second on a normal TI 83+! (my first attempt took several seconds per frame) Anyway, the lonquest Demo features ONE weapon, ONE cute little alien at a time, ONE medkit at a time, and ONE editable map at a time! That's right, not two, not three, but ONE of everything! (better than nothing, I suppose) And there are FOUR rays cast each frame! That's even more than three! Each with a resolution of FOUR possible distances! Wow! That makes a total of SIXTEEN possible frames! By the way, you turn by 30 degrees, not 90 degrees. So if you want to give me suggestions or make levels for the final version, try this demo out and email me. maze.zip10k11-02-26Maze of HorrorIn Maze of Horror, there are two modes to choose from, adventure and Deathmatch. This game is very entertaining, and will keep you occupied during math class!md2_83p.zip1k02-10-28Missile Defense 2Missile Defense 2 is an incredible 3D game where you get to shoot down enemy missiles. Aim the crosshairs and the fast-flying missile and shoot your laser to get it! Get ammo for each successful hit, lose if you are hit or run out of ammo. This has great graphics, none of that text-based stuff. Amazing!quake4plus.zip26k02-02-22Quake IVThe ULTIMATE Quake for TI-83 + !!! Includes a powerful 3D Engine, a Shoot'em up mode and a Deathmatch mode with a bot with true Artificial Intelligence !!!sfighter_plus.zip18k02-02-22Space FighterA 3D space combat simulation with sound.slavearena.zip4k10-02-22Slave Arena 1.2The 1st rpg fps. 2 players, 4 maps, 3d, and a map editor=FUN!ut2.zip74k04-02-16Ultra TournMent IThis is the sequel to the popular Unreal TournMent v1.0, the revolutionary all-3D first person shooter for the TI-83 and TI-83+/SE. This version contains seven new large, complex levels. The graphics engine has been rebuilt from scratch and all of the previous bugs have been eliminated. Also, two-player link play has been added with a proprietary assembly program. This game runs on the Real 3D graphics engine, and includes incredible 3D wall and environment rendering. The game is completely graphical; even the menus are graphical. At a mere 4.5K without the multiplayer modules, this is one of the smallest 3D first person shooters out there. Each of the seven possible levels takes less than 1 kbyte. There is no annoying wait while the program loads levels or screens; after an initial install to set preferences, from starting the program to starting shooting only takes about 5 seconds. There are enemies to shoot that shoot back, and you must collect health and ammo. If you run out of health from being shot, you lose. Now Doors CS v4.0 optimized.wolf3d.zip2k02-03-01Wolfenstein 3D betaA beta of a first person shooter that took me about 30 minutes to make.xwing.zip5k04-04-11X-Wing 2.0A 3D space combat simulator. Very graphical and very challenging.
